I really appreciate it! Thank you so much for checking out this course. Are you looking for a comprehensive guide to build your next great project with machine learning and deep learning? Are you looking for the best Artificial Intelligence Courses for beginners? If you want to learn this new skill quickly and accurately, then you are at the right place! This course will help you master the art of Artificial Intelligence, Machine Learning and Deep Learning by building one of the most advanced Artificial Neural Network projects. This project is composed of three main components: 1. Artificial Neural Network 2. Deep Learning Model 3. Deep Learning App The course will start by covering what an Artificial Neural Network is and how it works. We will then move on to how we can build a Deep Neural Network using Keras. In the second part of the course, we will learn how to set up the Deep Learning project in Pycharm. Finally, we will learn how to deploy the project to the cloud so we can use it on our own server. This course is over 20 hours in length and is broken down into 5 sections. So, whether you're looking to take your Artificial Intelligence knowledge to the next level or you're just starting out, this course will provide you with the knowledge and skills to get started. 2+ years working as a Data Scientist or Machine Learning Engineer Python knowledge
